

**CARRY
DORM GEL
AND
ADMINISTER
UNDER
THE
TONGUE**

DORMOSEDAN GEL[®]
(detomidine hydrochloride)

Key steps for using Dormosedan® Gel:

**WATCH HOW
TO DOSE AND
ADMINISTER**

Move the horse to a low-stimulation environment, removing access to food and water.

Wear gloves when handling the product.

Adjust the ring to the desired volume.

Dispense the gel under the horse's tongue and wait at least 40 minutes for full sedation to take effect.
